Objective

I am a Front-End Developer with 4 years' experience in Tech Support, System Integrations and Software Corporate Training along with 2 and a half years' experience in full-time Web Development. Passionate about shaping the future of the web, I am seeking a position that will allow me to create web apps and websites that are geared to the end user. I strive to understand the user who will be using the application inside and out to provide a clean and positive experience.

WORK EXPERIENCE

Front-End/Full-Stack Developer

Jackson Furniture

July 2017 – present

- ⊕ Complete redesign and overhaul of Jackson Furniture's website using HTML5, CSS3, JavaScript and PHP to create a responsive site for any device that you are on that is also cross-browser compatible.
- ⊕ During redesign, used AJAX to communicate to a PHP Laravel backend to bring all products and data into view from a SQL/DB2 databases.
- ⊕ Work with PHP and Python teams to create and manage web apps for internal user teams and for our external dealer portals.
- ⊕ Refactor and reduce a large existing legacy code base from 12 company-wide sites down to three across all platforms.
- ⊕ Develop backend code in PHP with a Laravel framework to handle and manipulate data.
- ⊕ Creating SQL queries to add, delete, update and manipulate data with our schemas and tables.
- ⊕ Work with Amazons S3 server for housing pictures of all our products.
- ⊕ Transitioning all web portals and platforms from Vanilla JS frontend to a Vue.js frontend.

Front-End Developer

MedProcure, LLC

March 2017 – July 2017

- ⊕ Contracted to design, develop and implement the front end of their new Supply Chain Management Software.
- ⊕ Combining HTML5, CSS3, Vanilla JavaScript and jQuery, I created the front end for their meal planning application where schools can offer to parents as a nutritional resource.
- ⊕ Using AJAX, I communicated with a PHP Backend to pull in all data to view and manipulate based on user interaction.

System Integration Specialist

Lucas Systems

May 2014 – August 2016

- ⊕ Trained and consulted with executives across the country on our software, usage and benefits it provides over existing software their stores are currently using.
- ⊕ Build systems and integrate our software and fully test system before taking it to customers stores to install and then provide opening support and training for all employees.
- ⊕ Integrate hardware and software to facilitate clear communication between all devices and get them to work together within the IT system before they are shipped to the customers site.
- ⊕ Respond to request via phone, electronically and in person, run diagnostic test, isolate problems, determine and implement solutions.
- ⊕ Run network cables through walls and ceilings and terminate both ends into patch panels and junction boxes.

IT Coordinator

Mt. Tabor United Methodist Church

May 2014 – August 2016

- ⊕ Designed and managed the Student Ministries website and the Mount Tabor United Methodist Church website using WordPress.
- ⊕ Troubleshoot, diagnose and repair staff computers, servers and network problem across two campuses.
- ⊕ Manage all Social Media aspects and marketing efforts for the church.
- ⊕ Lead a team of 4 volunteer IT professionals in managing all IT aspects of the church across two campuses.

CURRENT PROJECT

Over the last 9 months, I had transitioned to a Full Stack Developer with Jackson Furniture. With a few full stack apps under my belt, I have been developing tools and reports for internal departments to cut cost, run more efficiently and complete more task.

Since leaving Jackson Furniture to move to NC for my wife's job, I have been spending my time looking for new employment, continuing to grow my skills in full stack development and been doing a few side projects.
